

Mindset Reveal

Discover the thinking preferences that secretly rule your problem solving behavior

Program overview

The "FourSight Mindset Reveal" is a group training session that dives deep into the way people solve problems together. Content-rich, fun and immediately actionable, this engaging session introduces people to the mindset they need to spark and sustain more innovative problem solving.

Grounded in research, FourSight teaches the four stages of the universal creative process and reveals people's unique thinking preferences for clarifying, ideating, developing and implementing.

Teams analyze their group profile and learn to leverage the cognitive diversity of fellow members. Hands-on activities promote insights that help participants anticipate strengths and blind spots when they collaborate with others.

The FourSight® assessment

This scientifically valid assessment measures cognitive preference and is available in 10 languages.

After this program participants will be able to:

- Share a universal language to innovate, communicate and collaborate
- Understand where they gain and lose energy in the universal creative process
- Leverage thinking preferences
- Use specific strategies that increase creative-problem-solving effectiveness

What kind of thinker are you?
